PROFESSIONAL SUMMARY

Results-driven Frontend Developer with over 2 years of experience specializing in ReactJS and its ecosystem. Proven expertise in building high-performance, user-centric interfaces across insurance, eCommerce, and customer acquisition platforms. Skilled at developing custom payment systems and integrating KYC solutions, with a keen focus on UX and responsive design. Experienced in leading a team of 4 frontend developers to consistently deliver quality, optimized code.

EXPERIENCE

Frontend Developer | *Riggle*   *December 2024 – Present*
- Developed and optimized key front-end modules, including user permissions, onboarding, wallet, sales target management, and audience targeting for WhatsApp and SMS communication.
- Collaborated with product and design teams to validate business requirements, enhance user experience, and ensure seamless implementation of features.
- Conducted interviews, contributed to hiring decisions, and consistently delivered high-performance solutions while meeting project deadlines.
- Tech used: ReactJS, Redux toolkit, NextJS, AntDesign, Chart.js, SCSS

Software Engineer 1 | *Impactguru*   *September 2022 – November 2024*
- Led a team of 4 frontend developers, providing mentorship, ensuring code quality, and conducting code reviews to maintain alignment with best practices.
- Developed and optimized UI components using React, including custom payment systems and customer acquisition flows, increasing user engagement by 30% .
- Collaborated with cross-functional teams (product managers, data analysts, backend developers, designers, and quality analysts) to deliver cohesive solutions aligned with business goals.
- Conducted A/B testing and tracked user journeys, utilizing data-driven insights to improve customer engagement by 20%.
- Integrated insurance KYC solutions and managed third-party API integrations, enabling seamless user data synchronization.
- Optimized site performance through Styled Components, Webpack, and Babel, achieving a 40% reduction in load times.

Frontend Developer Intern | *Impactguru*   *September 2022 – December 2022*
- Designed responsive web pages, reducing load times by 50% through code optimization.
- Collaborated with data analysts to gather insights that enhanced the user interface, increasing user retention by 10%.
- Utilized debugging tools and applied progressive enhancement techniques, achieving a 30% improvement in UI performance.
- Addressed bug fixes and consistently improved user interfaces with a focus on code splitting.
- Proficient in utilizing debugging tools for issue identification and resolution.

Junior Associate Web Developer | *Nestable*   *March 2022 – June 2022*
- Created a data collection module that streamlined the onboarding of new home profiles, enabling operational agents to work 50% more efficiently and significantly reducing manual data entry.
- Developed a user-friendly interface within the module to guide agents through onboarding steps, resulting in a 30% improvement in onboarding accuracy and consistency.
- Implemented features that allowed real-time data validation and error handling, reducing rework by 25% and increasing agent productivity.
- Enhanced mobile suite functionality by debugging, troubleshooting, and performance optimization to improve user feedback and retention.

EDUCATION

University of Mumbai	**BSc in Informatio Technology** | CGPA : 8.0	*August 2019 – January 2022*
MSBTE	**Diploma in Computer Engineering** | Percentage : 65.25	*August 2015 – May 2019*

AWARDS AND CERTIFICATIONS

React + Redux | *Solo Learn*   *July 2022*
Jira Fundamentals Badge | *Atlassian*   *June 2022*
Digital Skill: User Experience | *Future Learn*   *February 2022*

TECHNICAL SKILLS

Languages : JavaScript, TypeScript, HTML, XML, JSON, CSS, Sass

Frameworks : ReactJS, NextJS, jQuery, Bootstrap

DevOps and API Tools : Git, Postman

Others : Agile (Scrum/Kanban), SOLID, Debugging,

PROJECTS

Nike Store | *HTML, CSS, JavaScript*   *November 2021*
- Developed an eCommerce site with animated elements and a user-friendly interface

Road Rash | *HTML, SCSS, JavaScript*   *October 2021*
- Recreated a JavaScript-based web version of a classic console game **(desktop-only)**

HooBank | *ReactJs, Tailwind Css*   *Auguest 2022*
- Crafted a modern, responsive static landing page, showcasing optimized layouts and cross-device compatibility.
